

RICEBEE BUSINESS SUITE

Implementation, Configuration & Business Workflow Replication

Quotation Amount: ₹75,000

Project Approach

- The RiceBee Business Suite requirements will be implemented using the selected business platform/model.
- The objective is to **replicate and configure the important RiceBee business workflows, modules, screens, reports, permissions and operational processes** within the selected platform rather than developing a completely new ERP system from scratch.
- The implementation will follow the business requirements provided by RiceBee, covering the major operational areas such as CRM, sales, B2B, POS, inventory, procurement, finance, HR, payroll, delivery and reporting.
- The RiceBee requirement document specifically defines the system as an integrated business operating system rather than a simple billing application.

1. CORE SYSTEM & USER MANAGEMENT — ₹5,000

Included Features

- Organization/business setup
 - User creation and management
 - Employee/user roles
 - Role-based access
 - Module-level permissions
 - Basic approval hierarchy
 - Branch/store/warehouse access configuration
 - Basic dashboard configuration
 - Common master-data structure
 - System settings
-

2. CRM & CUSTOMER MANAGEMENT — ₹6,000

Included Features

- Lead management
- Customer management
- Customer types

- Retail
 - Restaurant
 - Hotel
 - Caterer
 - Shop
 - Distributor
 - Wholesaler
 - Corporate
 - Institution
- Lead pipeline
- Follow-up management
- Customer activities
- Customer notes
- Customer contact information
- Customer addresses
- Customer history
- Customer 360° view
- Salesperson assignment
- Customer communication history
- Basic customer reports

The implementation will follow the CRM/customer-management requirements specified in the RiceBee document.

3. SALES, B2B & ORDER MANAGEMENT — ₹7,000

Included Features

- Lead → quotation → sales order workflow
- Quotation management
- Sales orders
- Retail sales
- Wholesale sales
- B2B sales

- Customer-specific pricing
- Quantity-based pricing
- Discounts
- Credit sales
- Advance/partial payments
- Partial deliveries
- Backorders
- Sales returns
- Credit notes
- Customer outstanding
- Order status management
- Salesperson assignment
- Sales reports
- B2B customer management
- B2B quotation/order workflow
- Credit limits
- Payment terms

The source requirements define the sales lifecycle from lead/quotation through order, inventory reservation, invoice, payment and delivery.

4. POS & BILLING — ₹7,000

Included Features

- POS configuration
- Product/SKU search
- Barcode-based billing
- Customer selection/creation
- Retail billing
- B2B billing
- GST billing
- Cash payments
- UPI payments

- Card payments
- Bank transfer
- Credit payments
- Split payments
- Discounts
- Coupons
- Hold/resume bills
- Sales returns
- Exchanges
- Refunds
- Invoice reprinting
- Cashier management
- Shift management
- Opening/closing cash
- POS reports
- Basic reconciliation

The RiceBee specification also identifies POS transaction integrity across orders, invoices, payments, inventory, accounting, customer history and analytics.

5. RICEBEE BUSINESS MODEL REPLICATION — ₹8,000

Included Features

- Configure the selected platform according to RiceBee workflows
- Replicate required business modules
- Configure RiceBee-specific fields
- Configure RiceBee-specific statuses
- Configure business workflows
- Configure approval flows
- Configure forms and views
- Configure dashboards
- Configure business rules
- Configure automated notifications

- Configure operational workflows
- Configure selected reports
- Configure module relationships
- Configure common business data flow

Platform Approach

The implementation can follow either:

Option A — Shoopy-based model

Shoopy remains part of the initial business ecosystem, as specified in the original RiceBee requirements.

Option B — Zoho One-based model

Zoho One is used as the primary business platform and the relevant RiceBee functionality is configured/replicated across the appropriate Zoho applications and customization capabilities.

Zoho One itself provides multiple business applications, customization/automation capabilities and centralized administration.

6. PRODUCTS, PRICING, INVENTORY & WAREHOUSE — ₹10,000

Product Management

- Product master
- SKU
- Barcode
- Product category
- Subcategory
- Brand
- Rice variety
- Product type
- HSN
- GST
- Unit of measurement
- Pack sizes
- Product images
- Product description

- Supplier mapping

Pricing

- Retail pricing
- Wholesale pricing
- B2B pricing
- Dealer pricing
- Promotional pricing
- Quantity-based pricing
- Customer-specific pricing
- Margin configuration

Inventory

- Stock management
- Available stock
- Reserved stock
- Incoming stock
- Outgoing stock
- Damaged stock
- Returned stock
- Warehouse stock
- Store stock
- Stock adjustments
- Stock transfers
- Stock movement history
- Reorder levels
- Low-stock alerts

Warehouse

- Warehouse configuration
- Locations
- Zones
- Racks
- Shelves

- Bins
- Picking workflow
- Packing workflow
- Dispatch workflow
- Stock movement
- Basic warehouse reports

The requirements specifically call for inventory ledgers, stock lifecycle, warehouse operations, batch/lot handling and stock controls.

7. PURCHASE & SUPPLIER MANAGEMENT — ₹5,000

Included Features

- Supplier master
- Supplier contacts
- Supplier history
- Purchase requests
- RFQ
- Supplier quotations
- Supplier comparison
- Purchase orders
- Goods receipt
- Purchase invoice
- Supplier payments
- Purchase returns
- Supplier outstanding
- Purchase reports
- Supplier performance tracking

Workflow

Purchase Request → Approval → RFQ → Supplier Selection → Purchase Order → Goods Receipt → Invoice → Payment

8. ACCOUNTING, GST & FINANCE — ₹8,000

Accounting

- Chart of accounts
- Customer ledger
- Supplier ledger
- Cash book
- Bank book
- General ledger
- Journal entries
- Accounts receivable
- Accounts payable
- Payment tracking
- Expense management
- Profit & Loss
- Balance Sheet
- Trial Balance
- Cash flow reporting
- Basic financial reports

GST

- GST configuration
- GSTIN
- HSN
- CGST
- SGST
- IGST
- GST invoices
- Credit notes
- Debit notes
- B2B/B2C classification
- GST reports
- Tax configuration

Expense Management

- Business expenses

- Employee expenses
- Expense approval
- Expense categorization
- Accounting impact

The source requirements explicitly include double-entry accounting, ledgers, AR/AP, GST, financial reporting and Indian compliance workflows.

9. HRMS, ATTENDANCE & PAYROLL — ₹7,000

HRMS

- Employee master
- Employee profiles
- Departments
- Designations
- Employee documents
- Joining information
- Employee status
- Basic employee self-service

Attendance

- Attendance tracking
- Shift configuration
- Working hours
- Overtime
- Attendance reports

Leave

- Leave types
- Leave requests
- Leave approval
- Leave balances
- Leave reports

Payroll

- Salary structure

- Salary components
- Deductions
- Incentives
- Advances
- Employee loans
- Payslips
- Payroll processing
- Payroll approval
- Payroll reports
- Payroll accounting configuration

The RiceBee requirements define HRMS, attendance, leave, recruitment and payroll as separate operational areas.

10. DELIVERY, OPERATIONS & CUSTOMER/DESPATCH WORKFLOW — ₹6,000

Delivery Management

- Delivery orders
- Delivery assignment
- Delivery status
- Delivery zones
- Delivery slots
- Delivery charges
- COD tracking
- Out-for-delivery status
- Delivered status
- Failed delivery
- Reattempt
- Return/RTO status
- Delivery reports

Delivery Operations

- Delivery partner assignment
- Delivery history

- Delivery performance
- Basic route/workflow configuration
- Proof-of-delivery workflow where supported

Customer/Delivery Experience

- Order tracking workflow
- Customer order history
- Delivery status notifications
- Delivery operational dashboard

The original requirements include order-to-delivery lifecycle, delivery assignment, routes, COD, OTP/POD and delivery partner operations.

11. ANALYTICS, REPORTING & AUTOMATION — ₹6,000

Dashboard

- Revenue
- Sales
- Orders
- Average order value
- Gross margin
- Expenses
- Receivables
- Payables
- Inventory value
- Low-stock products
- Purchase information
- Sales by channel
- Warehouse performance
- Delivery performance

Reports

- Sales reports
- Purchase reports
- Inventory reports

- Customer reports
- Supplier reports
- Expense reports
- Employee reports
- Payroll reports
- Financial reports
- Operational reports

Automation

- Automated notifications
- Follow-up reminders
- Approval workflows
- Status-based actions
- Scheduled reports
- Basic workflow automation

AI / Advanced Analytics

- Configuration of available platform AI/analytics capabilities
- Basic AI-assisted reporting where supported by the selected platform

The RiceBee specification includes Analytics/BI, forecasting, AI Copilot and workflow automation as later-stage capabilities.

12. TESTING, DEPLOYMENT & HANDOVER — ₹5,000

Included Features

- Module-wise testing
- Workflow testing
- User-permission testing
- Billing testing
- Inventory flow testing
- Purchase flow testing
- Sales flow testing
- Accounting flow testing
- Payroll flow testing

- Delivery flow testing
- Report verification
- Basic security/permission verification
- Deployment/configuration
- Initial production setup
- Basic data validation
- User handover
- Basic user training
- Documentation of configured workflows

The original RiceBee requirements explicitly call for requirements → workflow → data model → permissions → UI → validation → testing → implementation → documentation.

COST SUMMARY

Module	Amount
1. Core System & User Management	₹5,000
2. CRM & Customer Management	₹6,000
3. Sales, B2B & Order Management	₹7,000
4. POS & Billing	₹7,000
5. RiceBee Business Model Replication	₹8,000
6. Products, Pricing, Inventory & Warehouse	₹10,000
7. Purchase & Supplier Management	₹5,000
8. Accounting, GST & Finance	₹8,000
9. HRMS, Attendance & Payroll	₹7,000
10. Delivery & Operations	₹6,000
11. Analytics, Reporting & Automation	₹6,000
12. Testing, Deployment & Handover	₹5,000
TOTAL	₹75,000

CLIENT-BORNE PLATFORM / SOFTWARE COSTS

The following costs are **not included in the ₹75,000 implementation charge** and will be paid directly by the client wherever applicable:

- Paid platform subscriptions and add-ons
- Additional user licenses
- Additional storage/API usage charges
- Domain and hosting charges, where separately applicable
- **Google Play Store developer account / app publishing charges**
- **Apple App Store developer account / app publishing charges**
- App Store / Play Store deployment and publishing-related charges
- Usage-based WhatsApp, SMS, email or notification charges
- Payment gateway charges
- Any other third-party service or vendor charges required for production use

These are **external platform/vendor expenses** and are separate from the development, configuration and implementation fee of ₹75,000.

The client will provide and maintain the required developer/vendor accounts wherever ownership is required, such as Google Play Console and Apple Developer accounts.

The ₹75,000 quotation covers the agreed **implementation, configuration, business workflow replication, testing, deployment assistance and handover**. Any external platform subscription, account, license or usage fee will be borne separately by the client.

MONTHLY TECHNICAL MAINTENANCE — ₹2,000 / MONTH

Included

- Database management/maintenance
- API infrastructure maintenance
- Basic application monitoring
- Basic backup management
- Platform configuration maintenance
- Meta/WhatsApp integration maintenance where applicable
- Minor workflow/configuration changes
- Basic technical support

- Error monitoring
- Routine maintenance

Important

The ₹2,000/month maintenance covers the agreed technical maintenance scope.

Any **actual usage-based charges, paid subscriptions, additional platform licenses, messaging credits or other vendor charges** will be borne by the client separately.

PAYMENT TERMS

Advance — ₹10,000

₹10,000 payable at the time of project confirmation and initiation.

Remaining Amount — ₹65,000

The remaining **₹65,000** will be payable progressively based on project milestones, module completion and final deployment/handover.

Total Project Cost

₹75,000

Advance: ₹10,000

Balance: ₹65,000

Total: ₹75,000

IMPLEMENTATION MODULE

The implementation will be carried out in structured stages to configure the selected platform according to the RiceBee business requirements.

1

Requirement & Workflow Setup

- Finalize the agreed requirements
- Identify priority modules
- Map existing RiceBee business processes
- Define user roles and responsibilities
- Define approval workflows
- Finalize required fields, forms and statuses

2

Platform Configuration

- Configure organization/business settings
- Configure users and roles
- Configure modules and menus
- Configure master data
- Configure forms and fields
- Configure business rules
- Configure approval workflows
- Configure notifications and basic automation

3

Business Module Implementation

Implementation of the agreed core modules:

- CRM & Customer Management
- Sales & B2B
- POS & Billing
- Products & Pricing
- Inventory & Warehouse
- Purchase & Supplier Management
- Accounting & GST
- HRMS & Attendance
- Payroll
- Delivery & Operations
- Reports & Dashboards
- Workflow Automation

4

RiceBee Business Workflow Replication

The selected platform will be configured to follow the required RiceBee operational flow, including:

Customer/Lead → Quotation → Sales Order →
Inventory → Billing → Payment → Delivery →
Accounting → Reports

Similarly, procurement and employee workflows will be configured according to the agreed RiceBee requirements.

5

Data & Master Configuration

- Product master
- Customer master
- Supplier master
- Employee master
- Categories
- Pricing information
- Tax/GST configuration
- Warehouse/store information
- Opening data, where agreed

6

Reports & Dashboard Configuration

Configure the required operational and management reports, including:

- Sales
- Purchase
- Inventory
- Customer
- Supplier
- Finance
- GST
- HR/Payroll
- Delivery
- Business performance dashboards

7

Testing & Validation

- Module-wise testing
- End-to-end workflow testing
- User permission testing
- Billing testing
- Inventory testing
- Sales and purchase testing
- Accounting workflow testing
- Payroll workflow testing
- Report verification
- Bug/error correction within the agreed scope

8

Deployment & Handover

- Production configuration
- Initial deployment
- Final configuration verification
- User access setup
- Basic user training
- Workflow documentation
- Handover of the configured system

Implementation Approach

The implementation will prioritize the core RiceBee business operations specified in the quotation.

Additional modules or major custom development outside the agreed scope will be handled separately after discussion and approval.

SCOPE CLARIFICATION

This quotation covers the **implementation, configuration, customization, business workflow replication, testing, deployment assistance and handover** of the RiceBee Business Suite using the selected platform/model.

The project will be implemented based on the **RiceBee requirements document provided by the client**, with priority given to the core business modules and workflows included in this quotation.

Included in the ₹75,000

- Configuration of the agreed modules and workflows
- Replication of RiceBee business processes within the selected platform
- Configuration of forms, fields, dashboards and reports
- User roles and permissions
- Business workflow and approval configuration
- Required automation within the supported platform capabilities
- Testing of configured workflows
- Initial deployment and production setup
- Basic user training and handover

Not Included in the ₹75,000

The following will be treated as separate client-borne costs or separately quoted work where applicable:

- Platform subscription and license charges
- App Store / Google Play Store account and publishing charges
- Third-party software or service subscriptions
- Usage-based API, messaging, SMS, WhatsApp or email charges
- Payment gateway charges
- Domain and hosting charges, where applicable
- Hardware such as POS devices, barcode scanners, weighing machines, printers or other equipment

- Major custom software development beyond the capabilities of the selected platform
 - New modules or major features added after the agreed scope
 - Large-scale data migration or data cleansing beyond the agreed requirement
 - Future-phase features requiring substantial additional development
-
